EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 6, line 18, "an detector" has been changed to – a detector --.

2. The following is an examiner's statement of reasons for allowance: References Li (6,594,325), Walker (5,692,021), Stephenson, Jr. (5,235,332), Kosaka et al (5,040,195), and Saylor (4,129,748) are cited because they are pertinent to the apparatus and method for re-synchronizing. However, none of the cited references teaches or suggests, in combination, the arrangements of the clock oscillator, PLL oscillator, serial-parallel converter, detector, data extension circuit, data re-synchronizer, idle pattern generator, parallel-serial converter, data delay circuit, and data selector in order to form an apparatus for re-synchronizing an input data signal to be transmitted as a serial signal having a data frame and idle pattern, in which the data frame has a certain length or less and has its start and end positions to be detected, and the idle pattern is transmitted in intervals other than the data frame and has a length of integer times as much as that of a known bit string as recited in claims 1 and 6 and the corresponding method steps as recited in claim 7 and further limitations of their respective dependent claims 2-5 and 8-11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
